

## WHOSE FAULT IS IT?

The world is full of disease and pain. Whose fault is it? Everybody's; therefore often the fault of the sufferers themselves. But the pressing question is,—what to do, how to relieve, how to cure. What would become of us if means were not found to destroy disease? Why, then, of course, disease would destroy us and the world would be depopulated. Until we learn how to prevent disease, we must be thankful for the means of *abating and curing* it after it has seized upon us, and stands, like a savage with uplifted axe, ready to take our lives. Especially do we need some sure and speedy form of treatment for those complaints which are universal,—which arise in every country and climate. We allude to such ailments as Nervous and General Debility, Hysteria, Scrofula, Chronic Diarrhoea, Asthma, Throat and Lung Complaints, Blood Impurities, and the ills of women and children. For these **WAMPOLE'S PREPARATION** comes as near to being an actual specific as any medicine yet discovered. It is palatable as honey and contains the nutritive and curative properties of Pure Cod Liver Oil, extracted by us from fresh cod livers, combined with the Compound Syrup of Hypophosphites and the Extracts of Malt and Wild Cherry. You may almost say that it is *life itself* embodied in a single article made by human hands. Dr. J. L. Carrick says: "I have had remarkable success with it in the treatment of Consumption, Chronic Bronchitis, Catarrh and Scrofulous Affections. It is of special value in nervous prostration and depraved nutrition. It stimulates the appetite and the digestion, promotes assimilation, and enters directly into the circulation with the food. I consider it a marvelous success in medicine." Every dose effective. "It cannot disappoint." Sold by all chemists.

Above are shown two defects of the eye which call for glasses. These two conditions combine to produce other defects and many symptoms. Were it not for nerve and muscle forces of the eye, every man might select his own glasses; but with these ever in evidence, the man who attempts to fit his own eyes or the eyes of others, should have an intimate knowledge of this delicate organ. Our knowledge of the anatomical eye, and many years' practical experience in the fitting of glasses, is at your service.

## MOSQUITOES

FIG. 1. The young or "wiggler" of the Mosquito in water (greatly enlarged).

FIG. 2. The "day" Mosquito (enlarged).

## You are Responsible for the Mosquitoes in Your Own House and Dooryard. Read These Rules Carefully.

1. Mosquitoes breed *only* in water; usually fresh, standing water in artificial places.
2. Mosquitoes occur in the vicinity in which they breed. Invasions from long distances are exceptional.
3. The young mosquito or "wiggler" lives in water at least 10 or 12 days.
4. Although the wigglers live in water, they *must* come frequently to the surface to breathe.
5. Coal-oil on the surface of the water prevents the wiggler from breathing.
6. Destroy the breeding places and you will destroy the mosquitoes.
7. Empty the water from all tubs, buckets, cans, flower pots, vases, etc., once a week.
8. Fill in or drain all pools, ditches, and various excavations, as post holes left unfilled, etc.
9. Change regularly every week all water needed in chicken-coops, kennels, etc.
10. Treat with coal-oil all standing water which cannot be screened or drained (1 oz. of oil will cover 15 square feet of surface). The oil does not affect the water for use if the water is drawn from below.
11. Put wire-netting over cisterns, wells and tanks of water in every-day use.
12. Places in which it is undesirable to place oil, such as watering troughs for stock, lily-ponds, etc., can be kept free of the wigglers by putting in gold-fish. The nymphs of dragon flies and tadpoles of frogs also feed on the wigglers.
13. See that the plumbing about the place is in perfect order. Prevent leakage of pipes or clogging of eaves.
14. Inspect all cesspools and see that the covers are *absolutely* tight.
15. Clean away all weeds, grass and bushes about ditches, ponds, and other possible breeding places, since these afford a hiding place for the adult mosquitoes.
16. Clean up vacant lots and back yards of all cans, tins, bottles and rubbish.
17. First do away with or treat all places where mosquitoes are *KNOWN* to breed, and then begin work on places where they *MIGHT* breed.
18. As a citizen of your community you should feel a personal responsibility for the destruction of the mosquitoes in your district, and seek to co-operate with your neighbors in the work of doing away with breeding places. Inspect and treat with coal-oil gutters, culverts, ditches, man-holes, catch-basins, etc., along the roadside. Man-hole covers should be screened.
19. Where oil is applied to standing water it must be distributed evenly over the surface. Use a hand syringe, or, if the area is great, a knapsack sprayer.
20. Houses should be cleared of all winged mosquitoes by the burning of insect powder. The mosquitoes will fall to the floor, and should be collected and burned.
21. RELIEF IN ANY COMMUNITY OR DISTRICT DEPENDS ENTIRELY UPON THE CO-OPERATION OF THE MEMBERS OF THE COMMUNITY.

Publication authorized,  
JARED G. SMITH,  
Special Agent in charge of Hawaii Experiment Station.D. L. VAN DINE,  
Entomologist Hawaii Experiment Station.FOUR TANK LAUNCH WILL  
BRING IN MOLOKAI FISHForty-Foot Boat is Being Built for Mr. Gilbert  
to Make Daily Runs Between Molokai  
and Honolulu.

Within a month Honolulu will receive fresh fish every morning from the banks about the island of Molokai, and these will be disposed of in a special stall at the fish market. F. D. Walker began yesterday the building of a gasoline tank launch for Mr. Gilbert, who has been engaged in fishing off Waianae, and recently made a trial of the fishing banks off Molokai, where the catches have proved the existence of a plentiful supply.

It is Mr. Gilbert's intention to equip the new launch with a gasoline 40 horse power motor. The launch under its own power will make daily trips between Honolulu and Molokai, and into its tanks the daily catch made from Mr. Gilbert's present gasoline launch "Success," will be stored. The new launch will have sufficient speed to enable the craft to leave the Molokai fishing grounds at night, arriving at Honolulu by daylight. The tanks will then be emptied and the fish placed immediately upon the stall counter at the fish market in time for the earliest morning purchasers.

The keel of the launch was laid yesterday at Walker's boat works. The launch will be 40 feet over all, and will have a 40 h. p. engine. She will be schooner rigged and will carry two Marston sails.

Four tanks, each with a capacity of 200 gallons, will be built into the boat. These will be separate so that each can be filled or emptied independent of the others. Each tank will be fitted with valves connected with the engine so that the water in the tanks can be kept clear at all times thus insuring the fish therein being brought to Honolulu in a fresh condition.

Mr. Gilbert has made a couple of shipments of fish from Molokai by steamer, but this method of transportation is unsatisfactory.

## NOT A CANNIBAL.

A fat man walked into the restaurant and, after knocking down a few hats while hanging up his own, sat as much of himself down as the only vacant seat in the room would hold.

He grabbed a piece of the bread that had come with his right hand neighbor's order and began to munch on it.

Then he looked for the bill of fare. The ministerial looking man on his left was reading it. The fat man leaned over on him and began reading it too. "How's them pork chops and apple sauce?" he mumbled between mouthfuls of bread.

The ministerial looking man said nothing and edged his chair a little farther away.

Just then the waiter appeared with a bowl of bean soup for a patron on the other side of the table.

"Hey, waiter," awaked the fat man, "bring me one of them soups, and hurry up about it, will yer!"

The ministerial looking man heaved a sigh of relief.

"Thank goodness, sir," he said, turning to the fat man. "I was so afraid you were going to order pork. I detest a cannibal."

## FREE TO MEN! A BOOK FULL OF FACTS ABOUT

## Dr. McLaughlin's Electric Belt for Weak Men

I KNOW THAT NO MAN REMAINS A WEAKLING BECAUSE he wants to; I am sure that you want to overcome every indication of early decay that has shown itself on you. I don't think the man lives who would not like to feel as big and strong as a Sandow, and I know that if you have a reasonable foundation to build upon I can make you a bigger man than you ever hoped to be. I want you to know that, you who can't believe... and I want you to have my book in which I describe how I learned that manly strength was only electricity and how I learned to restore it; also I want to tell you the names of some men who will tell you that when they came to me they were physical wrecks and are now among the finest specimens of physical manhood.

## A HAPPY MAN

Dear Sir: Having used your famous electric belt for thirty days, I have received the greatest benefit that a man could gain—that is, health and strength. The tired, despondent feeling has gone. I feel the beginning of a new life, and am ever your debtor.

P. O. Box 482, Tucson, Arizona.

W. E. CLARK.

I want you to read this book and learn the truth about my arguments. If you are not as vigorous as you would like to be, if you have rheumatic pains, weak kidneys, loss of vitality, prostatic troubles, nervous spells, varicose or any ailment of that kind that weakens you, it would assure you future happiness if you would look into this method of mine. Don't delay it, your best days are slipping by. If you want this book I send it closely sealed free, if you send this ad. Call for free consultation.
